DETAILED ACTION

1. Claims 1-29 have been examined.

Allowable Subject Matter

2. The following is a statement of reasons for the indication of allowable subject matter: Claims 1-27 are allowable. The prior art of record discloses a protocol for cryptographic communication via a communication channel in which a sending cryptographic transmits onto the communication channel an encrypted ciphertext message obtained by supplying both a plaintext message and a cryptographic key to a first cryptographic device, and in which a receiving cryptographic unit receives the ciphertext message from the communication channel and by supplying the ciphertext message together with the key to a second cryptographic device decrypts the plaintext message therefrom, a method by which the sending unit and the receiving unit mutually establish a cryptographic key by first exchanging messages before the sending unit transmits the ciphertext message. In these protocols, a plurality of public quantities are made publicly available; the sending unit uses at least some of the plurality of public quantities in computing and transmitting to the receiving unit at least one sender's quantity; the receiving unit uses at least some of the plurality of public quantities in computing and transmitting to the sending unit at least one receiver's quantity; the receiving unit uses at least some of the plurality of public quantities and the plurality of sender's quantities in computing a session key. However, the prior art of record does not explicitly disclose the receiving unit transmitting for storage in a publicly accessible repository a plurality of public quantities computed from the at least some of the plurality

Art Unit: 2131

of public quantities; the sender using at least one of the plurality of public quantities to compute the key K; and the receiver uses at least one of the plurality of sender's quantities received from the sending unit to compute the key K. Therefore, claims 1-27 are allowable based on the reason stated above in light of other features disclosed in independent claims 1, 10, and 19.

Double Patenting

3. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

4. Claim 28 and 29 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 40 and 41 of prior U.S. Patent No. 7,020,282. This is a double patenting rejection.

Response to Arguments

5. Applicant's arguments, see Remarks, filed 5/3/06, with respect to claims 1-27 have been fully considered and are persuasive. The rejection of claims 1-27 has been withdrawn.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
